

# FRANK'S AGRI POST

Informations for  
Farmers

## A warm welcome!

News and facts from  
FRANK ORIGINAL.

Quarterly for you from the  
wear parts specialist for  
agricultural technology from Germany.

#FrankforFarmers

**PREMIUM QUALITY  
SINCE 1836!**

## Our product range

By the way, did you know that we have considerably broadened our product range in recent years through company acquisitions?

This applies in particular to the **knife** and **spring tine** area. We offer a wide range of standard components such as knives for loader wagons, for balers and knives for feeder mixer up to wear parts in the field of maize harvesting and sowing discs.

Our quality tines cover a wide range: Extra heavy tines, harrow tines, cultivator tines with clamps and reversible shares have been convincing our customers for a long time.

Our product groups:

- Wear parts and components for plows
- Wear parts for sowing machines
- Disc harrows
- Wear parts and components for cultivators
- Wear parts and components for mowers
- Wear parts for beet harvesters
- Wear parts for hoing technology
- Knives
- Crop lifters

**ALL PRODUCTS  
AT A GLANCE!**

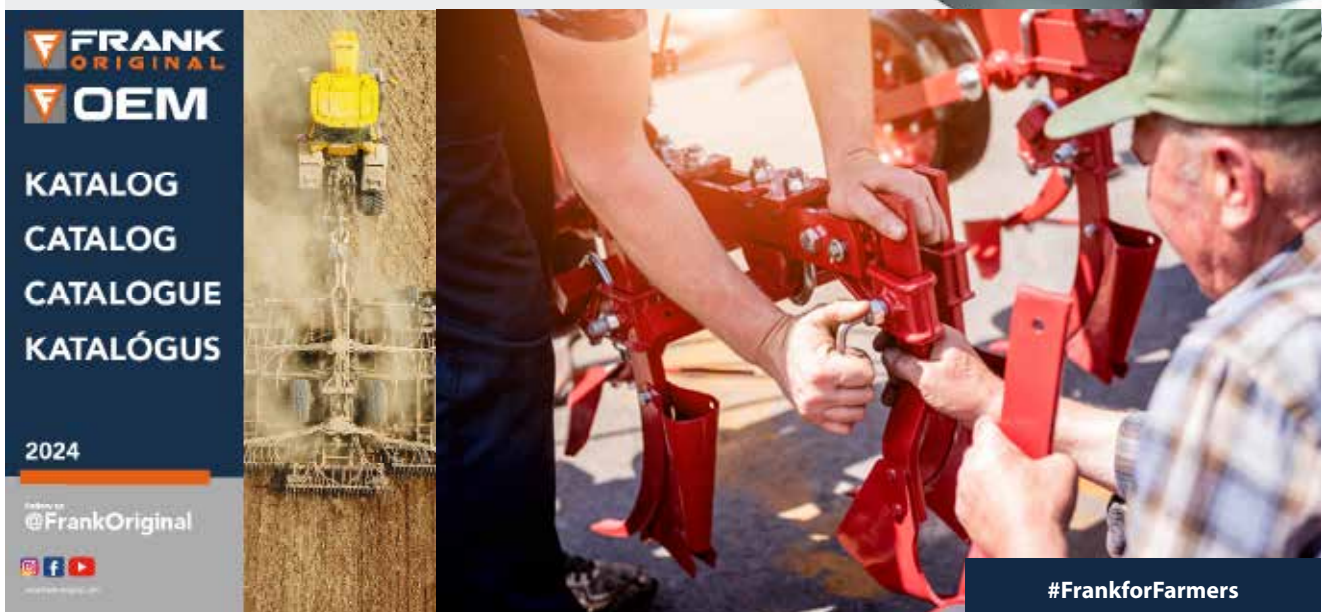

## New edition of our general catalog

Our updated catalog version will be published in print at the end of June and will then also be available for download in digital form on our new website.

This spring, we have already added more than 110 new products to our range and thus consistently implemented your wishes!

We have revised the presentation for our pan-European customers. For a better overview, the catalog has been divided into 3 versions in the following languages:

- German / English / French / Hungarian
- German / Polish / Rumanian / Bulgarian
- German / Ukrainian (Only digital version)

**FIND OUT WHAT MAKES US DIFFERENT!**

## Relaunch of the FRANK ORIGINAL website

We have updated our website and fundamentally revised some functions to make them even more customer-friendly.

The dealer search has been updated and now lists all FRANK ORIGINAL dealers in Europe.

The layout has also been modernized, the depth of information has been increased and the FRANK Group as a corporate group is now clearly presented as the foundation of the FRANK ORIGINAL brand.

We are looking forward to your visit to our homepage!

**The new website goes online on June 12, 2024 at [www.frank-original.com](http://www.frank-original.com)!**

Home

Since 1836, the name and brand FRANK ORIGINAL has stood for high-quality wear parts and components for agricultural technology. The FRANK Group covers the agricultural sectors of tillage and sowing technology, hoeing technology and special crops, as well as harvesting and gardening technology.

**WEAR PROTECTION FOR  
LONGER SERVICE LIFE**

## Protection options at a glance

We offer many of our products with wear protection, which significantly increases the service life compared to standard products without a coating.

And we optimize the *HardLine* products already equipped with extra wear protection (carbide tiles) in our production process through renewed heat treatment, thereby achieving workpieces of the **highest material quality**.

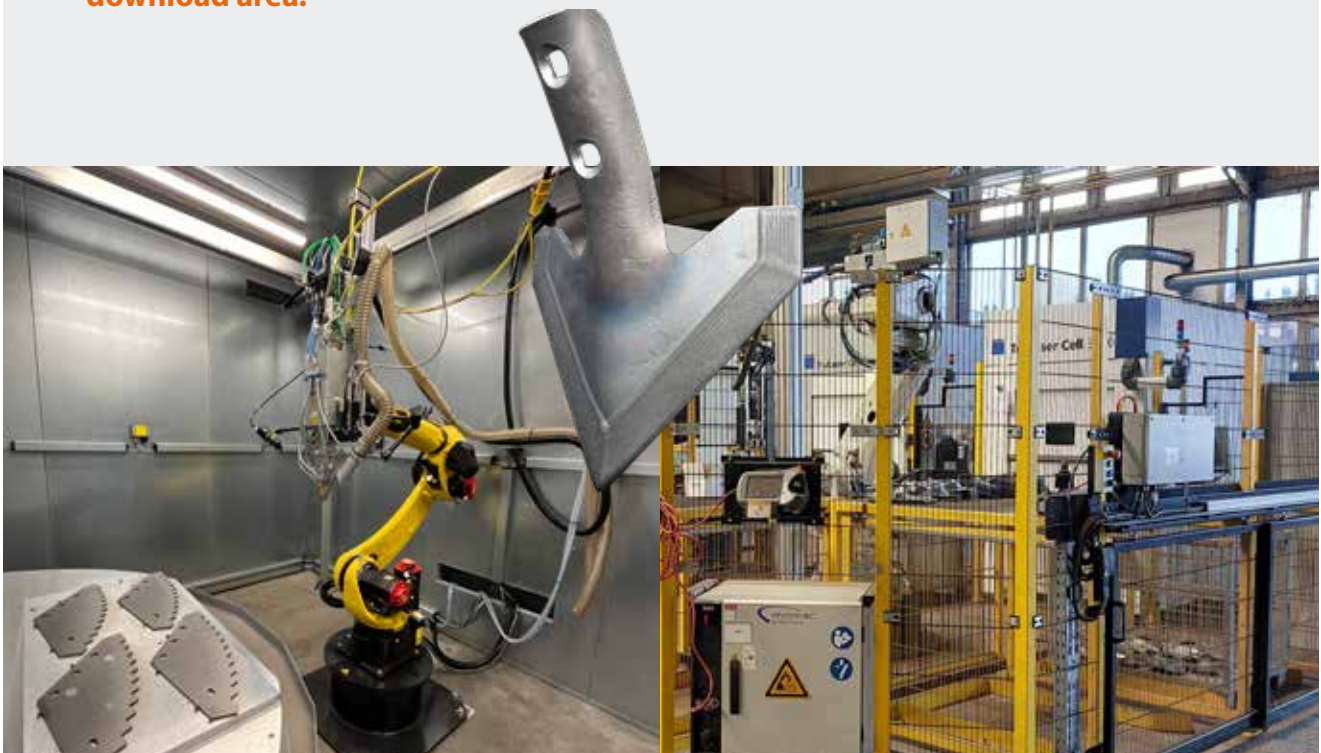

What types of protections are there?

Which type of protection is suitable for which type of soil?

What are the advantages of a wear part with wear protection coating?

Our upcoming overview "Technical Data Sheet Coating Options" will provide you with lots of useful information on state-of-the-art wear protection.

**Our flyer will be available from July 2024 at [www.frank-original.com](http://www.frank-original.com) under the download area!**

**PROTECTING  
AGRICULTURAL SOILS  
EVEN BETTER**

## **FRANK NeutraSoil** The more environmentally friendly paint finish

The FRANK Group is aware of its pioneering role in the agricultural industry. We strive to ensure the economical and efficient use of raw materials based on state-of-the-art production technologies and product innovations. In this way, we make an important contribution to environmental and climate protection.

With FRANK NeutraSoil, we have developed a coating for our wear parts that has a lower plastic content than traditional dip or powder coatings. After all, healthy soil is an essential prerequisite for a functioning agricultural sector with valuable agricultural produce..

**The first products are expected to be available for sale in the second half of 2024.**

### **Ask your specialist retailer!**

**ENVIRONMENTAL PROTECTION**

Wear parts and components for agricultural machinery

**#FrankforFarmers**

## **Plastic-reduced paintwork. For cleaner farmland!**

**WELL-BALANCED  
RANGE!**

## Expansion of our product portfolio Grassland technology / hoing technology

### Permanent updating of the product range

We always strive to align our current product range closely with the requirements and demand of the market. For this reason, our main focus is currently on our range of hoing and grassland technology.

We are currently reviewing the product range for this area and are planning to expand and update it, probably by fall 2024. We will keep you up to date!

## Brand new in the range

- Landside tips to fit Amazone/BBG
- Knives to fit Kerner
- Discs to fit Kuhn
- Skids and mower discs to fit Lely
- Small reversible cultivator points to fit Kongskilde
- Knives for forage wagons to fit Schuitemaker

**Ask your  
specialist dealer!**
